

LIST OF APPLICATIONS SUBMITTED TO CHI MANAGEMENT BOARD (1 April 2022 – date)

No.	Date Received	Applicant	Title	Summary	Date Approved	Decision	Precedent/Notes
22-02	10-Mar-22	NHS National Services Scotland (NSS) Ken Truslove	Validation of GP Practice code for Community Pharmacy Patients	Access to CHI to request eligibility status for all Universal Claim Framework services (Pharmacy First Scotland and non-Pharmacy First Scotland services) that mandate a GP practice code. Under this proposal, details of the GP practice code and registration status were to be returned to Pharmacy systems along with the CHI number where applicable.	8-Apr-22	Approved	
22-03	25-Apr-22	NHS National Services Scotland (NSS) Karen Brown	Scottish Birth Record (SBR) access to hourly e-screener plus file (eSP)	Amend the approval previously granted for SBR access to the CHI daily broadcast file (21-08) to the hourly CHI eSP file	26-Apr-22	Approved	
22-04	11-Jul-22	Scottish Government Ryan Laurenson	Social Security Scotland – Public Sector Supporting Information	Amend the approval previously granted (21-02) to permit a client's CHI to be made visible on the Data Sharing Portal application	22-Jul-22	Approved	

23-01 Fast	04-Jan-23	Scott Douglas NHS Greater Glasgow & Clyde	National Laboratory Information Management System (LIMS) implementation programme	Obtain data to populate a new LIMS system being implemented across Scotland starting with NHS Fife, Orkney and Shetland. Data will be migrated into the new system from historical LIMS which will be replaced. Populating the database will reduce the initial overhead of performing a patient lookup to local SCI Stores when an order is received either electronically or on paper. NHS Lothian patients are required initially as a result of patient flow between NHS Lothian and NHS Fife. This will be followed by NHS Lothian, NHS Grampian, NHS GGC and NHS Forth Valley. It is expected that these deployments will happen from November 2023 and run to at least December 2024.	09-Jan-23	Approved	
-------------------	-----------	--	---	--	-----------	----------	--

23-02	25-May-23	Scott Douglas NHS Greater Glasgow & Clyde	National Laboratory Information Management System (LIMS) implementation programme – additional request	Obtain a CHI download of all patients in NHS Scotland. The LIMS will be seeded with Boards that are implementing the system along with any CHI records associated with legacy data that is being migrated.	06-Jul-23	Approved	The approach for LIMS implementation in all Boards is to extract data from SCI Store. Whilst that may have some tactical benefits it may not be the correct strategic approach beyond the first three boards in the consortium. Going forward, the CHIMB would like consideration to be given to integration directly to CHI using standard interfaces which new CHI will provide. Using the ADT may be convenient, but it is not real-time and address updates which CHI has from other sources won't be in the ADT file until it is then produced again following updates from CHI to SCI Store.
23-03	27-Jun-23	Jill Gordon NHS NSS	Endoscopy Reporting System	CHI data to facilitate positive patient identification as part of the new Solus Endoscopy Reporting System	20-Jul-23	Approved	Submission of a fully completed DPIA required

23-04	13-Jul-23	Rebecca Grainger Ministry of Defence	Programme CORTISONE connections to National Services Scotland	UK DMS primary HealthCare IT systems to electronically connect/integrate with specific NHS Scotland National Health IT systems.	16-Oct-23	Approved	
23-05	22-Dec-23	Iain Robertson Scottish Government	Query/Response Interface to CHI for Scan for Safety Programme	Facilitate positive patient identification and to form a complete patient record with full traceability of implantable medical devices	18-Jan-24	Approved	Subject to submission of satisfactory DPIA
24-01	07-Mar-24	Craig Whyte Scottish Government	Social Security Scotland – Public Sector Supporting Information CHI Automation	Integration of the CHI Lookup Service with Social Security Scotland's client record system (Social Programme Management).	09-Apr-24	Approved	
24-02	05-Apr-24	Jennifer Wilson NHS Golden Jubilee	Digital Dermatology Image Capture Pass-Through Application for access to CHI	Facilitate positive patient identification and form a complete patient record. The objective of the programme being to implement a pathway for photo acquisition in primary care for store-and-forward teledermatology for triage of primary care referrals to secondary care dermatology services across all Health Boards by the end of 2024	09-May-24	Approved	Recommended that any photographs be accompanied by a fiducial marker

24-03	15-Aug-24	Iain Ross NHS Highland	Clinical IT in Prisons Programme	Extend access of the North of Scotland Regional Care Portal to NHS healthcare providers operating in Scottish Prisons. This is to enable clinicians access to view the electronic patient record of a person in prison. If the patient record does not exist in the North of Scotland Portal, then options are to be available for clinicians to access other Health Board portals where a record may reside.	08-Oct-24	Approved	
24-04	10-Sep-24	Kevin Watt Mental Welfare Commission for Scotland (MWC)	MWC Access to CHI	Validate CHI numbers for individuals contained within the current Mental Welfare Commission Information Management System to improve the data quality before migrating to a new software supplier. Initially this will be done by accessing data via the CHI User Interface and a data download from NSS\PHS. When a new supplier is in place it is proposed to integrate with the data via a read only API.	14-Oct-24	Approved	
24-05	12-Sep-24	Benjamin Garner Dolby Medical Home Respiratory Care Ltd	Sintesi CHI Integration	Integrate Sintesi ERP system with the CHI database via an Application Programming Interface (API), to confirm patient demographics held match those for NHS Scotland Patients. This is for the purpose of delivering the contracted Home Oxygen Service for NHS Scotland patients.		Pending
